

Period Promise Campaign Rolls Out in BC

01

British Columbia has made a monumental move, all public schools are now required to provide free menstrual products for students in school bathrooms, as mandated by the provincial government. British Columbia is the first province to make feminine hygiene supplies available to students at no cost. Click [here](#) for the full story.

02

Erythromycin Shortage

MARK THOMAS / SCIENCE PHOTO LIBRARY

Shortages of erythromycin ointment for newborn eye prophylaxis are being reported. In response, the Canadian Pediatric Society (CPS), in collaboration with a representative from the Canadian Association of Pediatric Ophthalmology and Strabismus (CAPOS), have released a **statement** to guide health professionals.

National Immunization Awareness Week 2019

03

Immunity to measles should be reviewed with women of reproductive age. The Canadian Immunization guide recommends adults over 18 years and born after 1970 and do not meet the definition of measles immunity should be immunized with 1 dose of MMR vaccine. Click [here](#) to read the guide.
